

ACROBA 4 directional forklift

Straight & sideways movement

TCM

13
MODELS

1.5 - 4.3 tonne

ACROBA, the newly launched ace forklift for the 21st century features four important firsts in the industry: straight lateral movement, zero radius pivotal turning, a swivelling driver's seat for easier and safer operation, and a 2x2 HST (hydrostatic) drive system. Our dream of transforming the conventional usage of the forklift with a vastly wider, more efficient field of applications, while simultaneously enhancing work-environment safety, has indeed come true.

The worldwide usage of forklift trucks is shifting increasingly more toward electric-powered forklifts. Therefore, TCM developed the new electric ACROBA in 2001 with two more friendly and comfortable features:

Diesel	Battery Electric
FA15D	FA15B
FA20D	FA20B
FA25D	FA25B
FA30D	FA30B
FA35D	FA35B
FA40D	FA40B
FA43D	-

30-percent increased generation power capacity as well as easier and simpler electrolyte refuelling.

In view that ACROBA products are such valuable trucks suitable for use in many new applications, our worldwide distributors are always ready to explain and demonstrate the full details of ACROBA's new features and functions, which TCM believes will substantially contribute to the upgrading and rationalization of your overall material-handling operations.

A forklift & sideloader in one

ACROBA J 2 directional forklift

with pivot turn capability

1.5 - 3 tonne

Borrowing on the technology developed with TCM's industry first all directional forklift, Acroba, the Acroba Junior was developed to offer many of the features offered in the full Acroba package but in a more compact and more economical package.

The Acroba J series offers incredibly small turning circles via its pivot turn capabilities that allow it to match the turning circles of a similar capacity 3 wheel forklifts, but in a more stable 4 wheel chassis.

A more compact body allows for operation in very narrow aisles and spaces, together with a smart and fresh new appearance make the Acroba J series a real winner.

3 wheel manoeuvrability in a 4 wheel forklift
